Art Unit: 1773

1. Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, claims are not clear for the following reasons:

Term such as "a thermoplastic resin other than a polyester resin" is indefinite.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0985701.

The EP '701 reference disclose a polyester film substantially as claimed. The EP '701 discloses coarse projections within the claimed projections as well as compositions and properties of the polyester films. See description pages 1-7, Tables.

The applied EP '098701 does not specifically discloses the claimed two types of the coarse projections H1 and H2. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to optimize such coarse projections of the polyester substrate, since such would improve magnetic properties of the multilayered magnetic media
